

## **ICT Enabled Tools for Effective Teaching-Learning Process**

**Information and Communication Technology (ICT) in education is the mode of education that use information and communications technology to support, enhance, and optimise the delivery of information. Worldwide research has shown that ICT can lead to an improved student learning and better teaching methods. The pandemic has forced the Education Sectors to shift dramatically to virtual and blended modes of teaching and learning using various Information and Communication Technology**

**ICT has radically accelerated the pace and urgency of various ongoing technology-driven educational initiatives. Students and teachers are now relying on various online platforms to adopt new pedagogical methods to learn and teach. Educational**

**Communities across the world are coming together and figuring out various ways to support students and teachers with innovative platforms and strategies. The crisis has helped in the stimulation of innovation in the education field. India has also seen various ICT led initiatives to reach out to everyone in such difficult times, including the most marginalized population.**

**Educational communities have been using various platforms like-Google Classroom, Microsoft Team Zoom, and many more to continue the process of learning for students amid pandemic. This strengthened the belief in the potential of ICT tools in reshaping the education sector.**
